Frucon Engineering George Butler Associates Great River Engineering of Springfield, Inc. Hanson Professional Services Inc. Harrington & Cortelyou, Inc. (H&C) HDR Engineering Inc. Horner & Shifrin, Inc. Howard R Green Company Jacobs Juneau Associates, Inc. P.C. Kuhlmann design Group, Inc. (KdG) McDonald & Warger, Inc. Modjeski and Masters, Inc.	Additional Information: Letters of interest from 72 consulting firms were received in response to our solicitation letter dated October 17, 2008. A pool of 38 consultants were selected out of the 72. As consultants are needed to assist in producing the plans for the 248 Safe & Sound bridges, which will be built through the design/bid/build process, the selection will be made from this list In-house and consultant resources for the first 100 bridges have already been identified to meet our goal of having the first 100 bridges under construction contract by Spring 2009. How much consultant assistance is needed for the remaining 148 bridges will depend greatly on how fast the plans for this group of bridges must be finished. It is possible that not all selected consultants will receive contract opportunities. A better idea of the plan completion dates for the remaining 148 bridges is expected by January 1, 2009. Please keep in mind that this solicitation is not related to the design/build contract for 554 Safe & Sound bridges. That effort is underway and is being led by Project Director Ken Warbritton. For the latest information on the design/build contract please visit our website at http://www.modot.mo.gov/safeandsound/index.htm or contact safeandsound@modot.mo.gov
